THE WEALTH MAKER

The cover drawing of a newsprint machine is by Franklin Arbuckle, R.C.A. One hundred and forty-nine of these machines, in Canadian mills from coast to coast, supply almost half the free-world's newspaper pages. As long as a football field, they may spin out a ribbon of paper, up to twenty-eight feet in width, at speeds as great as twenty-five miles per hour. The newsprint mills, the producers of pulp, and the manufacturers of hundreds of other grades of paper and paperboard constitute Canada's greatest industrial enterprise. In value of production and exports, pulp and paper leads all Canadian industry.

Introduction

These tables annually present a succinct picture of pulp and paper operations, their intimate relationship with the forest resources and the forest crop, and something, too, of the importance of the industry in the economy of Canada.

Every effort has been made to include herein as many 1958 figures as possible; but in many instances it has been impossible either to obtain the 1958 figures or to provide informed estimates. Particularly is this so of 1958 dollar value figures many of which will not be available from government sources until the end of 1959.

While the material herein is clearly set forth in the index, it should be noted that Section "B" contains a summary of the industry's operations for 1957, and relates the production and markets of that year to the pulpwood harvest. Section "F" contains figures revealing not only the national significance of the industry, but also general statistics covering its operations as a whole.

In Section "D", the Newfoundland statistics have been consolidated, unless otherwise noted, with those of Canada for all years. Elsewhere, Newfoundland figures have been consolidated with those of Canada only since 1949 as prior to that year they were not compiled on the same basis as those of the Dominion Bureau of Statistics. The figures covering Newfoundland's production up to 1948 will be found in Tables 34, 45, and 70.

The publication of these tables has largely been made possible through the kindly aid of L. J. Pouliot, chief of the Forestry Section of the Dominion Bureau of Statistics; and to him grateful acknowledgment is made.

Table 6. Depletion and Growth, 1958

Pulp and Paper Woodlands

The pulp and paper mills lease 182,840 square miles of forest, or slightly more than 117 million acres. Over the past five years, the wood taken by the mills from this acreage has averaged 8½ million cords a year. Such a cut runs to an average of 6¼ cubic feet per acre per year to which, in order to obtain the total depletion, must be added the losses caused by fire, insects, disease, and natural mortality.

Scientific measurements all reveal that the overall growth in these leased forests exceeds the cut plus all other losses. This excess of growth serves to increase the standing volume of pulpwood which, in most instances, will render the acreage more productive and so permit larger annual harvests to meet the growing needs of the future.

Source: Woodlands Section, Canadian Pulp and Paper Association.

The National Forests

The inventory of productive forests which cover a quarter of Canada's land area, is nearing completion. Simultaneously, a large quantity of new information relating to growth rates in the productive forests is being assembled. Preliminary estimates indicate that annual growth rates over a considerable portion of the productive forests range as high as 25 to 40 cubic feet per acre. Annual depletion on the accessible productive forests, for which it is possible to give a more accurate figure, averages about 7 cubic feet per acre, and includes cutting and losses from fire.

This is not the whole story. This seemingly favourable balance on a national scale is tempered by the following conditions:

1. The annual depletion caused by insects and disease, for which reliable estimates do not exist, is believed to exceed the losses from fire.
2. Regional examples of over-cutting in the more accessible areas indicate that control and adjustment is necessary to bring cut in line with growth potential.
3. Greater costs may be encountered in developing more remote supply areas.

Table 9.
Cords, Cubic Feet, and Board Measure

A standard cord is a stack of wood 4 x 4 x 8 feet containing 128 cubic feet of wood, bark, and interstices. A cord usually contains about 85 cubic feet of solid wood, but the content varies with the size of the logs.

In the lumber industry, wood is usually measured by the board foot. A board foot is the equivalent of a board one inch in thickness and one square foot in surface area. The relationship between board measure and cord measure varies in different sections of the Dominion. Usually, 2 cords are considered to be equivalent to about 1000 feet board measure. But this ratio also varies with the size and type of the wood.

One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

"B"—FROM WOOD TO MARKETS—1957

This section contains a summary of the industry's operation for 1957, relating production and markets to the pulpwood harvest.

Table 13.
Pulpwood Supply

	Cords(a)	Value
Pulpwood Production*, by Provinces:		
Quebec	6,637,000	$186,339,542
Ontario	3,818,598	108,438,295
British Columbia	1,453,354	28,564,785
Other Provinces	3,078,934	77,282,130
Canada	14,987,885	$400,624,752
Pulpwood Imports	179,614	2,858,726
Total Supply	15,167,499	$403,483,478
Less Pulpwood Exports	1,800,411	42,331,768
Pulpwood Used	13,367,088	$361,151,710
Other Wood Used (b)	1,091,805	20,828,204
Total Wood Used in Mills	14,458,893	$381,979,914

* Apparent production, roundwood only, i.e. whole logs and bolts. For actual production, see Table 11.

(a) Quantities are given in terms of rough or unpeeled wood. One cord of peeled pulpwood is equivalent to 1.125 cords of rough or unpeeled wood.

(b) Residual wood, such as sawmill and veneer mill chips, slabs and edgings, sawdust and butts and cores.

Source: Dominion Bureau of Statistics.

Table 14.
Pulp Supply

From the 14,458,893 cords of wood used in the mills, the following pulps were manufactured in 1957:

	Tons	Value
Groundwood pulp	5,574,233	$227,668,164
Chemical pulp	4,526,667	468,067,374
Other pulp*	324,395	10,459,111
Total Wood-Pulp Production	10,425,295	$706,194,649
Wood-pulp imports	64,884	8,345,109
	10,360,411	$697,849,540

In addition to wood-pulp, the following fibrous materials were used in 1957 in the production of certain grades of paper and paperboard:

Rag, cotton and flax waste and sweepings, and cotton linters	22,758	$ 1,824,378
Old and waste paper and broke (purchased)	406,438	13,068,461
Side runs (purchased)	4,792	346,524
Straw	24,069	396,305
Flax fibre	1,266	171,891
Fibre and leather scrap	3,561	128,746
Manilla stock, including jute bagging, rope, waste, thread, etc.	513	45,961
Other paper stock	816	36,099
Total Other Stock Used	464,213	$ 16,018,365
Total Stock	10,360,411	$713,867,905
Pulp inventories at pulp and paper mills at the beginning of the year	182,284e	19,414,143e
Total	10,542,695	$733,282,048
Less pulp inventories at pulp and paper mills at the end of the year	158,070e	16,842,976e
Sold, or converted into paper, paperboard and other board	10,384,625	$716,439,072

* Includes screenings, off-quality, semi-chemical, defibrated and exploded pulp.

e: Canadian Pulp and Paper Association estimate.

Source: Dominion Bureau of Statistics.

Table 15.
Shipments by Products

From the 10,384,625 tons of pulp available for conversion or sale in 1957 the following products were manufactured and shipped:

Wood-Pulp:	Tons	%	Value	%
To Canadian customers	297,255	2.74	$ 39,394,402	2.87
To Canadian affiliated mills	195,572	1.80	21,605,858	1.58
To foreign customers (a)	2,259,251	20.84	273,961,635	20.00
Total Wood-Pulp	2,752,078	25.38	$ 334,961,635	24.45
Newsprint (b)	6,316,699	58.27	$ 724,612,940	52.90
Paperboard and Other Boards:				
Paperboard	822,141	7.58	$ 119,016,283	8.69
Building boards	216,119	1.99	24,257,506	1.77
Wet machine boards	8,017	0.08	1,438,521	0.10
	1,046,277	9.65	$ 144,712,310	10.56
Other Papers:				
Wrapping papers	263,840	2.43	$ 57,414,716	4.20
Book and writing papers	330,092	3.05	85,792,978	6.26
Tissue and sanitary papers	47,071	0.43	14,218,935	1.04
Building papers	79,046	0.73	6,198,911	0.45
Special industrial papers	6,368	0.06	1,981,151	0.14
	726,417	6.70	$ 165,606,691	12.09
Total Paper and Board	8,089,393	74.62	$1,034,931,941	75.55
Total Shipments of Pulp and Paper (c)	10,841,471	100.00	$1,369,893,576	100.00
Converted paper products			$ 36,091,380	
By-products and miscellaneous services			$ 5,949,506	
Total Value of Mill Shipments			$1,411,934,462	

a: Including shipments to subsidiary or affiliated companies.

b: Dominion Bureau of Statistics classification includes some grades not classed as newsprint by the Newsprint Association of Canada.

c: As much of the pulp shipped to Canadian customers and Canadian affiliated mills was utilized in the manufacture of paper and board, there is some duplication in this figure.

Source: Dominion Bureau of Statistics.

Table 16.
Wood-Pulp Use and Sale

Tons	Production	Imports	Exports	Consumption by Canadian Paper Mills	Apparent Domestic Sales or Inventory Changes(a)
Groundwood	5,574,233	—	247,616	5,327,432	— 815
Sulphite, paper grades	2,396,654	42,603	691,284	1,757,627	— 9,654
Sulphate, paper grades	1,705,806	18,261	1,015,843*	701,853	6,371
Dissolving and Special Alpha	341,927	4,020	275,385	3,920	66,642
Screenings and others	406,675	—	52,528	352,128	2,019
	10,425,295	64,884	2,282,656	8,142,960	64,563

* Includes dissolving and Special Alpha.

a: Minus quantities indicate reduction of inventories.

Table 21.

Chemical Pulps — Dissolving and Special Alpha (Sulphite and Sulphate)

(See Note)

	Production		Exports		Imports		Apparent Supply (b)
	Tons	Value	Tons	Value	Tons	Value	Tons
1956	402,635	$69,242,400	303,423*	$53,939,400*	3,118*	$603,462*	102,330
1957	341,927	48,748,953	275,385*	49,216,827*	4,020*	812,875*	70,562
1958	306,551e	n.a.	218,406*	39,023,953*	3,749*	734,487*	91,894e

Note: Comparable figures not published prior to 1956. For statistics of sulphite dissolving pulp 1944-1955, see Table 28.

*: Sulphite only.

b: estimated on the basis of production plus imports minus exports. Although the values shown for production, exports and imports are individually correct value of Apparent Supply cannot be calculated in this manner, because each series comprises varying proportions of several grades, and their valuation also differs.

c: fraction of a ton.

e: Canadian Pulp and Paper Association estimate.

g: includes semi-bleached.

n.a.: not available.

a: For years prior to 1946, breakdown of total screenings exports into chemical and mechanical screenings estimated on basis of known quantity and value "made for export".

Other footnotes: See Table 21.

Note: Screenings were not reported separately prior to 1923. It is assumed that these were included with "Other wood-pulps". Exports of screenings prior to 1927 were probably shown with "All other manufactures of wood, n.o.p.".

Source: Dominion Bureau of Statistics.

"D"—NEWSPRINT

Data in this section have been compiled by Newsprint Association of Canada from the sources mentioned.

Throughout this section Newfoundland statistics are included, unless otherwise noted, in the Canadian totals for all years. For reference purposes only, Newfoundland data to 1949 are given separately in Table 45.

Table 40. Newsprint Capacity, Production and Shipments

Capacity is shown as at the beginning of each year plus allowances for new machines from the date they are expected to operate. It is possible for production to exceed capacity partly because no allowance is made for improvements in equipment during the year.

Source: Newsprint Association of Canada.

Table 41. Newsprint Capacity and Production

Tons	Number of Work Days	Capacity Per Day	Production Per Day
1935	310	13,752	9,945
1936	310	13,606	11,405
1937	309	13,627	12,938
1938	309	14,676	9,362
1939	308	15,042	10,307
1940	310	15,213	12,161
1941	309	15,219	12,203
1942	309	15,415	11,180
1943	309	15,139	10,417
1944	309	15,296	10,565
1945	309	15,120	11,624
1946	308	15,068	14,630
1947	308	15,353	15,650
1948	309	15,803	16,126
1949	308	16,601	16,806
1950	307	17,025	17,194
1951	308	17,402	17,910
1952	309	17,833	18,405
1953	308	18,580	18,576
1954	311	19,030	19,306
1955	310	19,559	19,963
1956	310	20,115	20,890
1957	311	21,701	20,614
1958	312	23,175	19,559

Because of variations in the number of workdays, daily capacity provides the most accurate measurement of changes in capacity.

1955	1,409,000	1,552,294	1,373,638	176,543	1,550,181
1956	1,625,000	1,717,243	1,582,742	132,628	1,715,370
1957	1,921,000	1,825,897	1,698,477	118,278	1,816,755
1958	2,100,000	1,757,796	1,675,508	85,126	1,760,634

These figures are compiled from U.S. mill reports and shipments to overseas show only exports direct from mills. They do not include tonnage delivered to U.S. buyers and subsequently resold for export, such tonnage being included in shipments to U.S.A. Exports as reported by U.S. Department of Commerce are thus higher than mill reports; in 1958, the Department showed exports of 127,368 tons versus 85,126 tons reported by the mills.

Source: All figures for 1913-32 and supply from Europe thereafter are compiled from U.S. Department of Commerce reports; from 1933 to date supplies from Canada and U.S. are compiled from reports to NAC and NSB respectively of mill shipments. Trade Association and government figures are not strictly comparable because of time lag between shipments and arrival dates and because of minor differences of newsprint definition.

* End of Each Year.

† U.S. total consumption is based on consumption reported by the ANPA group. For each year the percentage of total U.S. supply taken by this group is assumed to represent the percentage of total consumption consumed by the group. Total consumption is obtained by extending ANPA percentage to 100. Total consumers' stocks are computed from stock plus supplies received less total consumption in each year.

ANPA: American Newspaper Publishers Association.

NOTE "A": A new classification, adopted in 1944 by the Dominion Bureau of Statistics, differs from the one given above. However, for purposes of general comparison with the years 1920-43, some of the figures given in Tables 62 and 63 may be utilized. "Paperboard," "Building Boards," and "Wet Machine Boards" would approximate the "Paperboard" group given above, while "Special Industrial Papers" and "Building Papers" would approximate the "All Other" group. The "Book and Writing," and "Wrapping" groups are virtually identical in both classifications, while "Tissue and Sanitary" is nearly comparable to the "Tissue" classification given above.

NOTE "B": Some of these figures will differ somewhat from those issued by the industry itself, as DBS classifications differ at times from those of the Canadian Pulp and Paper Association.

NOTE: See notes A and B of Table 61.

(a) Groundwood Printing and Specialty Papers (containing more than 50% groundwood); Book Paper (including printing papers with 50% or less groundwood); Fine Papers; and Miscellaneous Fine Papers.

(b) Reported in Pulp and Paper industry only. Wood-pulp board used in paper-converting plants to produce laminated building boards is reported by pulp and paper mills as "Other Boxboard."

(c) Prior to 1949 some producers of wet machine board were classed in another industry, and small quantities reported in the pulp and paper industry were added with "Other Boxboards" until 1943 and with "Special Industrial Papers" since 1944.

e: Canadian Pulp and Paper Association estimate.

Table 64.

Exports of Paper (Except Newsprint) — Volume in Tons

In the past, the basis and classification upon which exports of paper other than newsprint have been compiled have been modified from time to time. Consequently, only figures covering recent years are included in this and Tables 65 and 66.

Moreover, because they are compiled on a somewhat different basis, the two tables which follow are not comparable to the production figures in Tables 62 and 63.

Also, some of the exports go through a converting plant before shipment. Thus, many of the exports have a value enhanced by the conversion or packaging process, whereas the production figures show the valuation at the basic rate.

Again, the tonnage figures for certain paper products exported are not available. The dollar figures covering these exports will be found in the succeeding table under the heading "Paper Products".

* Preliminary figures.

† Includes Newfoundland since 1949. In 1948, the last year before accession, Newfoundland's Gross National Product was about $175 million.

All National Income figures from 1926 have been compiled on a revised basis in December, 1951. Figures for years prior to 1926 are not comparable.

a: The "national income" is the total of all incomes earned by Canadians in the production of goods and services during the calendar year. The "gross national product" is the market value of all goods and services produced by Canadians. It is obtained by adding to the national income two items which are not "income" but which are part of the final cost of all goods and services — namely, allowances for depreciation of plant and equipment, and indirect taxes less subsidies.

b: The "net value of production" or value added by manufacture is computed by subtracting the cost of fuel and electricity as well as the cost of materials from the gross value of the products.

The figures for the years prior to 1926, when the National Income figures were compiled on a different basis and for which the gross National product figures are not available, were as follows:

	Gross Production of Industry	Net Production of Industry	National Income
1921	$151,003,165	$73,765,200	$3,507
1922	158,950,956	81,258,232	3,671
1923	184,821,511	95,076,985	3,847
1924	179,259,504	89,629,253	3,865
1925	193,092,937	99,071,212	4,239

1955	125	62,205	1,326,938,138
1956	126	65,985	1,465,057,726
1957	128	65,940	1,419,288,324

a: Number of mills operated during year.

b: Includes products other than pulp or paper.

Note: At the close of 1958 there were altogether 137 pulp and paper mills in Canada, which were active during all or part of the year. This total includes two asbestos paper mills which, for statistical purposes report in the Asbestos Products industry only.

Manufacturers of moulded pulp products and of laminated, coated or impregnated papers and paperboards are classed in the Paper Goods Industry or in the Roofing Paper industry only, unless they produce the pulp or paper used, in which case returns are made covering pulp and paper manufacture, including paper conversion, if separate returns cannot be prepared.

Table 77.
Capital Expenditures

For the years 1948 to 1958, annual surveys of the Department of Trade & Commerce, covering some 95 per cent of the industry, show the following capital expenditures:

Year	Millions of $
1948	79.3
1949	71.8
1950	68.6
1951	108.9
1952	115.6
1953	91.9
1954	69.0
1955	118.4
1956	239.6
1957	234.4
1958	109.6*
	1,307.1

* Preliminary.

The foregoing figures do not include capital expenditures made on the woodlands nor, of course, expenditures for maintenance and renewals.

1957	3,131,200,000e	65,940	47,486	307,627,849

a: Woods labour is not included.
b: Figures on capital employed were compiled by the Dominion Bureau of Statistics from 1920 to 1943. Those for 1944 on are taken from "Taxation Statistics", published by the Department of National Revenue. The two series are not exactly comparable, the former excludes the value of inactive mills, timber limits, power developments, and investments, in wholly or partly owned subsidiaries and other enterprises. The latter includes such assets but does not cover pulp and paper mills operated by companies classed in other industries according to their principal or end product such as lumber, paper boxes, and roofing paper. For the years 1944-47 the figures cover only "profit" companies; since 1948 they cover both "profit" and "loss" companies. In 1956, the 96 pulp and paper companies covered had total assets of $3,021,600,000 and current liabilities of $391,100,000.
e: Estimate.
Sources: Dominion Bureau of Statistics and Department of National Revenue.

Table 81. Estimated Wages Paid and Numbers Employed in 1957

Wages	
Mill Workers	$307,627,849
Wood Workers*	202,531,000
	$510,158,849
Workers	
Seasonal woods workers on manufacturers' limits east of the Rockies	151,000
Permanent woods workers on manufacturers' limits east of the Rockies	5,000
Woods workers in B.C., mostly permanent	10,900
Woods workers cutting wood for sale to manufacturers	91,700
	258,600
Mill Workers, permanent	65,940
	324,540

* Includes an estimated $75,320,000 to the 91,700 woods workers cutting pulpwood for sale to the mills. Includes also those working for contractors cutting pulpwood on pulp and paper company limits. The terms of pulpwood cutting contracts are of an infinite variety ranging from those in which the contractor and his men are company employees to those in which the contractor is a free agent. Some companies cut all the wood required from their own limits.

Source: Woodlands Section, Canadian Pulp and Paper Association estimate.

Table 82.
Growth in Employment and Wages

	1915	1957
Mill Workers	15,300	65,940
Wages and salaries paid	$11,000,000	$307,627,849

The average wage paid mill workers in 1957 was $4,356 while the average salary was $6,121.

Principal Expenditures 1957

Transportation(e)	$ 249,965,000†
Chemical & mill supplies*	159,088,769
Fuel	62,798,858
Electricity*	45,838,107
Fibre and fibre stock*	16,197,843
Purchased pulpwood**	37,664,624
Purchased wood-waste (for pulping)*	19,954,529
Foods(e)	21,000,000
Fodder(e)	2,000,000
Taxes & other pay'ts to Gov'ts(e)	223,000,000
Wages, including woods workers**	510,158,849
	$1,347,666,579†

e: Canadian Pulp and Paper Association estimate.

* Dominion Bureau of Statistics figures.

** Expenditures for purchased pulpwood in 1956 totalled $112,989,624 from which has been deducted $75,320,000 covering the estimated wages paid in harvesting this wood. The latter figure is included in the $510,158,849 shown as wages. See also Table 81.

† There may be some duplication where the value of purchased pulpwood, mill supplies, fuel, chemicals, and so forth, include transportation costs to the mill.

Table 85.
Purchases of Mill Supplies 1957

Chemicals, minerals, size, glue, dyes, etc.	$ 63,538,595
Pulp stones	842,213
Machine clothing (woollen felts)	14,810,796
Miscellaneous supplies	55,174,903
Mill wrapping and packing material	14,224,602
Wire mesh (fourdrinier and cylinder)	10,497,660
	$159,088,769

Sand, Gravel, Stone, Cement, Plaster, Lime, Brick, Tile, Sewer and Drain Pipes, and other Mineral Products	422,264	10.46	391,968	10.39
	1,649,410	40.85	1,433,935	38.03
Other Products				
Sugar, Canned Goods, Beverages	52,525	1.30	58,768	1.56
Fertilizers	43,551	1.08	43,293	1.15
Miscellaneous	290,527	7.20	314,994	8.35
	386,603	9.58	417,055	11.06
Merchandise, L.C.L.	658,775	16.32	595,668	15.80
Grand Total	4,037,346	100.00	3,770,988	100.00

Note: Car loadings of pulp and paper and pulpwood in 1958 were equivalent to 646 cars and 341 cars respectively, every day in the year. A proportion of the pulpwood car loading included pulpwood for export. Deducting an estimate for pulpwood shipped abroad, the pulp and paper industry's car loadings of pulpwood and finished products were equivalent to over seven trains of 100 cars daily. Annual loadings of pulpwood for the mills and of finished products would thus fill a train 2,275 miles in length. In addition, the pulp and paper industry creates a vast rail traffic of coal, chemicals, and other supplies required for the operations at the mills and in the woods.

	71,079,448	77,140,810	78,325,082
Plus: Imports	158,562	239,173	569,260
Canadian consumption	71,238,010	77,379,983	78,894,342

n.a.: Not available.

Note: The power consumption of the pulp and paper mills accounts for about 28 per cent of all the power generated by central electric stations for industry and for mining. Of the power generated by industry for its own use, the pulp and paper mills accounted for 39.7 per cent in 1955 and 22.7 per cent in 1956. Of the total consumption of electricity in Canada, the pulp and paper mills accounted for 21.1 per cent in 1955, 19.7 per cent in 1956 and 20.4 per cent in 1957. There are several single paper mills which alone consume more electric power than all the domestic customers in Montreal combined, indeed which use more power than is required to provide light for the city and all its residents. There are single pulp and paper mills which use half as much power as that consumed by all the industries in the Montreal area.

Table 95. Gross Value of Canadian Production

	1956 '000 $	1957 '000 $
PRIMARY PRODUCTION		
Agriculture	3,016,948	2,526,097e
Wheat	*714,053*	*442,570e*
All grains (including wheat)	*1,415,503*	*955,574e*
Forestry	3,043,615	2,735,701e
Operations in the woods	*939,143*	*760,724e*
Fisheries (excluding Nfl'd)	169,169	162,040e
Trapping	12,361	10,951e
Mining	3,069,395	3,087,708e
Mineral production	*2,084,906*	*2,190,322*
Electric Power	613,840	656,496e
Less Duplication (forest production on farms)	—88,899	—61,000e
Total, Primary Production	9,836,429	9,117,993e
SECONDARY PRODUCTION:		
Manufactures	21,636,749	22,183,593
Construction	6,381,700	7,048,300e
Less Duplication in Manufactures	—3,806,217	—3,564,848
Total, Secondary Production (See Notes below).	24,212,232	25,667,045e
Grand Total	34,048,661	34,785,038e
MANUFACTURES:		
Paper Products	1,887,611	1,865,719
**Pulp and paper*	*1,453,442*	*1,411,934*
Paper boxes and bags	*241,444*	*253,497*
Wood Products	1,446,613	1,335,171
**Sawmills*	*639,414*	*555,688*
Furniture (including mattresses and springs)	*297,554*	*307,341*
Sash, door and planing mills	*243,381*	*224,579*
Printing, Publishing and Allied Industries	688,434	731,200
Foods and Beverages	3,826,702	4,171,971
Slaughtering and meat packing	*844,889*	*907,088*
Butter and cheese	*431,255*	*469,852*
Flour mills	*221,770*	*204,376*
Bread and other bakery products	*306,805*	*331,132*
**Fish processing*	*169,936*	*150,708*
Iron and Steel Products	2,756,769	2,912,148
Primary iron and steel	*680,860*	*704,566*
Industrial machinery	*329,447*	*363,000*
Sheet metal products	*296,043*	*309,499*
Transportation Equipment	2,192,935	2,269,203
Motor vehicles	*988,143*	*948,597*
Aircraft and parts	*354,510*	*424,443*
Railway rolling stock	*345,516*	*386,722*
Non-ferrous Metal Products	1,862,156	1,683,382
**Non-ferrous metal smelting*	*1,396,565*	*1,280,146*
Brass and copper products	*244,096*	*182,396*
Textiles	766,977	747,667
Cotton yarn and cloth	*236,360*	*218,903*
Synthetic textiles and silk	*161,161*	*163,810*
Knitting Mills	165,150	172,162
Clothing (Textile and Fur)	733,770	749,628
Men's factory clothing	*272,146*	*272,426*
Women's factory clothing	*237,611*	*245,395*
Chemicals and Allied Products	1,111,233	1,203,411
Acids, alkalies and salts	*193,541*	*215,834*
Paints, varnishes and lacquers	*126,312*	*131,133*
Medicinal and pharmaceutical preparations	*122,592*	*140,093*
Soaps, washing compounds, etc.	*109,385*	*118,873*
Fertilizers	*83,399*	*83,808*
Products of Petroleum and Coal	1,377,226	1,491,926
Petroleum products	*1,253,799*	*1,376,559*
Electrical Apparatus and Supplies	1,090,194	1,078,213
Non-metallic Mineral Products	572,539	602,165
Concrete products	*155,369*	*162,898*
Glass products	*87,169*	*90,824*
**Hydraulic cement*	*78,606*	*97,079*
Abrasive products	*46,023*	*51,049*
**Clay products from domestic clay*	*37,785*	*35,922*
**Lime*	*16,462*	*17,529*
**Salt*	*14,007*	*15,842*
Leather Products	237,032	238,789
Leather footwear	*136,682*	*142,163*
Rubber Products	355,584	326,091
Tobacco and Tobacco Products	239,243	249,734
Miscellaneous Manufacturing Industries	326,580	355,013
Total	21,636,749	22,183,593

* Industries included both in primary and secondary production.

e: Preliminary estimates. Other figures not yet available.

Notes: Since 1952, "value of factory shipments" has replaced "gross value of products" in all manufacturing industries except Sawmills, Aircraft and parts, Shipbuilding, Railway rolling stock, Bridge and structural steel works, Hydraulic cement, Clay products from domestic clay, Coke and gas products, Lime, Salt, Tobacco processing and packing, and Publishing (only) of periodicals; also Pulp and paper and Veneer and plywood until 1956. As inventories are relatively small in the industries for which factory shipments are used, the general comparability of the figures is not seriously affected.

The gross value of products or of factory shipments given above, is limited to the annual production of commodities, and is not comparable with "gross national product" given in Table 72, which includes transportation, communication, trade, finance, and service activities. The computation is entirely different and the "gross national product" comprises, in addition, depreciation allowances, other similar business costs, and indirect taxes less subsidies.

While the statistics of gross production are of interest, indicating the amount of revenue generated by the corporations and operators in the field, the total includes a large element of duplication: often the products of one industry become the materials of other industries. The net value of production obtained by deducting the cost of materials, fuel and electricity is a more accurate measure of the contribution to the national economy.

The value of agricultural production includes forest production on farmers' wood lots. As such products are also reported under forestry, the amount of duplication is deducted.

A survey of production must differentiate between the more important branches and at the same time present a grand total that will be free from overlapping. For example, the products of pulp and paper mills and sawmills are included in forestry production as being the first finished products of commercial value resulting from the productive process. They may, however, be classified under manufactures in view of the nature of the production process. The production of such industries is regarded both as primary and secondary, but the duplication is eliminated from the grand total.
